

A step 2 component of the Henry® 1-2-3 Moisture Control System™

## Moistop® Corner Shield

### A seamless drainage plane for window corners

**Moistop® Corner Shield** integrates into the wall system to create a tough barrier in the most vulnerable section of the window installation, the corners. User-friendly and less costly than sill pans, **Moistop Corner Shield** is available in Flexible and Rigid versions and installs without large mechanical fasteners.

**Moistop Corner Shield** is considered an accessory to the Henry® 1-2-3 Moisture Control System™ of flashings, weather-resistive barriers and sealants. The system takes the guesswork out of weatherization so you can build with confidence. **Moistop Corner Shields** may carry a 15-year warranty. (See [henry.com/warranty](http://henry.com/warranty) for details.)

### Features and benefits

#### Moistop® Flexible Corner Shield

-  Integrates into the wall system and conforms to the window frame
-  Flexible, polyolefin construction can correct for framing irregularities

#### Moistop® Rigid Corner Shield

-  Made from durable high density polyethylene plastic
-  Fits snugly and will not gap
