Typical Physical Properties

- **Color** | Beige
- **Solids by Weight** | 55%
- **Weight** | 8.3 lbs/gal (1.0 kg/l)
- **Drying Time @50% R.H. +20°C** | 2 Hours to touch dry, 24 Hours to firm dry
- **Service Temperature** | -40°F to +158°F (-40°C to +70°C)
- **Application Temperature** | 40°F to 122°F (+4°C to +50°C)
- **Tensile Strength** | 119 psi (820 kPa)
- **Elongation** | 800%
- **Recovery** | 90%
- **Peel Strength, to Dry Concrete** | 3319 lbf/ft (4.5 kN/m)
- **Aging -Long Term Flexibility** | No fracturing
- **Nail Sealability** | Pass
- **Resistance to Mold, Mildew & Fungal growth** | -0- No Growth
- **VOC content, max.** | 100 grams/liter, max
- **Watertightness** | Pass
- **Water Vapor Permeance** | 0.08 perms (5 ng/Pa.m².s)
- **Air Permeability Tests** | Pass
- **Resistance to Gust Wind Load** | Meets Mass/Canadian code requirements for air leakage at 3000Pa gust load suction pressure
- **Chemical Resistance** | Resists salt solutions, mild acids and alkalis. Non-resistant to oils, grease or solvents.
- **Fire Testing** | Complies with NFPA 285
- **Flame Spread** | 20
- **Smoke Developed** | 55

**Description**

Air-Bloc® 32MR is a single component, fluid applied, elastomeric membrane designed to provide an air, water and vapor barrier when applied to above grade wall assemblies. This product cures to a tough monolithic rubber-like membrane which resists air leakage and water penetration plus acts as a vapor barrier. Air-Bloc® 32MR combines the proven performance of Air-Bloc® 32MR with the addition of Henry antimicrobial technology to create an integral mold resistant membrane.
Air-Bloc® 32MR Fluid Applied Air, Water & Vapor Barrier Membrane

Features

- Seamless, non-permeable elastomeric membrane for above grade wall assemblies
- Retains flexibility over a wide temperature range. Cold applied by trowel or spray
- Meets highest industry standards for air barrier performance
- Integral mold resistant formulation
- Easy, low cost spray application
- Effective moisture vapor barrier
- Excellent adhesion to most construction surfaces such as exterior gypsum board, CMU, concrete, stone, wood and metal

Product Sizes

5 gal pails, 55 gal drums

Uses

Air-Bloc® 32MR is used in construction of high performance wall assemblies requiring a vapor barrier combined in an air & water barrier membrane. Integrated with Blueskin flashing and accessories to form a complete wall system meeting highest industry performance standards. Commonly used on variety of wall substrates and sheathing prior to installation of exterior cladding.

Limitations

Must be protected from damage during construction. KEEP FROM FREEZING. Do not apply to wet surfaces. Not designed for permanent exposure to weather - protect as soon as possible, however can be exposed up to 3 months if necessary to accommodate construction scheduling.

Air-Bloc® 32MR shall not be applied when ambient (air) and substrate temperatures are below 40°F (5°C). The product should not be applied if it is raining, or if the possibility of rain is likely within 16 hours. The product should not be applied if it is expected that the ambient temperature will fall below 32°F within 24 hours. Following installation of Air-Bloc® 32MR in new building construction, CMU walls where product has been applied must be protected at the roof line to prevent water infiltration into the wall cavity.

In hot weather or direct-sun applications over porous substrates, such as concrete, rapid surface drying can form blisters. A thin ‘prime coat’ application to substrate, which is allowed to dry, often prevents blister formation in subsequent application. Alternatively a two coat application vs. single heavy coat – with back rolling of base coat – also aids in prevention of blistering in hot weather.

Surface Preparation

All surfaces must be sound, dry, clean and free of oil, grease, dirt, excess mortar or other contaminants. New concrete should be cured for a minimum of 16 hours before Air-Bloc® 32MR is applied. Concrete surfaces should be free of large voids and spalled areas. Joints between panels of exterior grade gypsum, plywood and rigid insulation up to ¼” wide shall be filled with a trowel application of Air-Bloc® 32MR and reinforced with a strip of 2” wide glass fiber tape such as Henry #183 Yellow Glass Fabric prior to application of liquid membrane. Joints between panels of exterior grade gypsum or plywood wider than ¼” should be sealed with Blueskin® membrane adhered to the primed substrate (use Blueskin® Primer or Henry #545 Aquatac™) and lapped a minimum of 3” on both sides of the crack. Joints wider than ¼” between panels of rigid insulation are not permitted. Mortar joints on CMU walls should be struck flush with block surface. Cracks in masonry and concrete up to ¼” wide shall be filled with a trowel application of Air-Bloc® 32MR and allowed to cure overnight prior to application of the liquid membrane to the surface, or alternatively, the cracks may be sealed with a strip of Blueskin® membrane applied to the primed substrate (use Blueskin® Primer or Henry #545 Aquatac™). Cracks wider than ¼” should be sealed with Blueskin® membrane adhered to the primed substrate and lapped a minimum of 3” on both sides of the crack. Transition joints between two dissimilar materials at beams, columns, window and door frames, etc., should be sealed with strips of Blueskin® membrane, lapped a minimum of 3” on both substrates. Mechanical attachment should be made to all window and door frames, or a properly designed sealant joint should be provided.
Joint & Crack Treatment

Dynamic or expansion joint treatment must be in compliance with projects’ architectural details and specifications.

Sheathing or Substrate Non-Moving Joint Treatment Options:

Note: apply per products’ published Technical Data Sheets

Select One:

- Permeable option:
  - BlueskinVP 160
- Non-permeable option:
  - Blueskin SA
  - Blueskin SA LT
  - Blueskin SA HT
  - Foilskin

Application

Air-Bloc® 32MR may be applied by brush or heavy-duty airless spray in a single or dual-coat application. Apply in continuous, monolithic application without sags, runs or voids, transitioning onto flashing membrane to create a uniform drainage plane and air-barrier. Regularly monitor wet mil thickness during application to assure adequate coverage.

Coverage Rates: Apply per published architectural specifications. Typical application rates include:

- **Smooth Surfaces** such as exterior gypsum sheathing or formed concrete: 5 gal US / 100ft² (2.0 l/m²) to give a wet film thickness of approximately 75 mils (40 mils dry) depending on texture and porosity of surface.
- **Rough Surfaces** such as CMU: 7gal US / 100ft² (2.8 l/m²) to give a wet film thickness of approximately 110 mils (60 mils dry) depending on texture and porosity of surface.

Protection of Finished Work: Air-Bloc® 32MR and Blueskin® are not designed for permanent exposure. Product is designed to withstand job site exposure for up to 3 months, however good construction practice calls for covering as soon as possible. Wherever possible, begin covering membrane on south exposures, followed by remainder of surface.

Precautions

When transporting this product, be sure the container is secured and the lid is tight. Do not allow container to tumble as this may loosen the lid and allow leakage to occur. Avoid freezing during storage, application and before material has cured.

Clean Up

Use waterless hand cleaner for skin. Spray equipment can be flushed out with water. Use citrus based cleaners to remove dried films.

Caution

DO NOT TAKE INTERNALLY! Close container after each use. Avoid breathing of vapors as it may cause respiratory tract irritation. Use protective measures to avoid contact with eyes and skin. If swallowed, CALL PHYSICIAN IMMEDIATELY! In case of eye contact, open eyelids wide and flush immediately with plenty of water for at least 15 minutes. In case of accidental injection by power spray equipment, GET MEDICAL ATTENTION! Dispose of container and unused contents in accordance with Local, State and Federal regulations. Do not heat container or store at temperatures greater than 120°F. KEEP OUT OF REACH OF CHILDREN. FOR EXTERIOR USE ONLY. KEEP FROM FREEZING.

WARNING: This product contains detectable amounts of chemicals known to the State of California to cause cancer, or birth defects or other reproductive harm.

Employers should obtain a copy of the Material Safety Data Sheet (MSDS) from your supplier or directly from Henry at the toll free number or website below.

Limited Warranty

We, the manufacturer, warrant only that this product is free of defects, since many factors which affect the results obtained from this product – such as weather, workmanship, equipment utilized and prior condition of the substrate – are all beyond our control. We will replace at no charge any product proved to be defective within 12 months of purchase, provided it has been applied in accordance with our written directions for uses we recommended as suitable for this product. Proof of purchase must be provided.

DISCLAIMER OF WARRANTIES AND LIMITATION OF LIABILITY: THIS LIMITED WARRANTY IS IN LIEU OF ANY OTHER WARRANTIES EXPRESS OR IMPLIED INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FOR A PARTICULAR PURPOSE. MANUFACTURER SHALL HAVE NO LIABILITY OF ANY KIND BEYOND PRODUCT REPLACEMENT, INCLUDING FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES RESULTING FROM ANY DEFECTS OR ANY DELAYS CAUSED BY REPLACEMENT OR OTHERWISE. THIS LIMITED WARRANTY PROVIDES THE PURCHASER'S EXCLUSIVE REMEDY FOR ANY DEFECT IN THE PRODUCT.

Contact Warranty Department at warranty@henry.com or location shown below for product or systems warranty information.

STATEMENT OF RESPONSIBILITY

The technical and application information herein is based on the present state of our best scientific and practical knowledge. As the information herein is of a general nature, no assumption can be made as to a product's suitability for a particular use or application and no warranty as to its accuracy, reliability or completeness either expressed or implied is given other than those required by law. The user is responsible for checking the suitability of products for their intended use. Henry Company data sheets are updated on a regular basis; it is the user's responsibility to obtain and to confirm the most recent version. Information contained in this data sheet may change without notice.
