

# Don't Let the Cold Slow You Down

Henry® Air-Bloc® 16MR Liquid-Applied Air & Vapor Barrier

## Finally, an impermeable air barrier solution that won't let temperature slow you down.

Sometimes project timing can be as unpredictable as the weather. Air-Bloc® 16MR allows you to keep working on time even when temperatures fall below freezing without extra equipment or additives.

Air-Bloc® 16MR combines the properties of low VOC, superior fire performance and integral mold resistance through a proprietary water-based elastomeric formulation that remains sprayable even in temperatures as low as 20°F.

The single component application quickly cures to a tough, monolithic membrane resisting air leakage and water penetration, providing a seamless air and vapor barrier for above-grade walls.

**LEARN HOW AIR-BLOC®16MR  
LEAVES THE COMPETITION COLD**

## Henry® Air-Bloc® 16MR provides a high-value solution where the competition struggles. †

	<b>Sprayable Down to 20° F</b> Helps keep project on schedule	<b>Single Component</b> Reduce jobsite complication	<b>Freeze-Thaw Stable</b> Recover frozen material during application	<b>NFPA 285 Compliant</b> Compliant within multiple wall assemblies	<b>Low VOC Content</b> Complies with strict regulations
