

Henry® Maintenance Systems

Henry® Maintenance Systems (HMS) provide an economical approach to extending the life of your roof.

- **Save Energy** – reduce peak cooling demand by up to 15%*
- **Save Money** – lower cost than roof replacement
- **Occupant Comfort** – keep interior spaces cooler
- **Cool Roof** – lower roof surface temperatures by up to 50° F*
- **Durability** – prolong service life of roof
- **Lightweight** – adds minimal structural load
- **HVAC Efficiency** – reduce wear and tear
- **Tax Advantages** – potentially reduce your tax burden**
- **Good for the Environment** – reduces landfill waste due to roof tear-offs
- **Peace-of-Mind** – reliable roof service life for years to come

or visit www.henry.com.**

*Source: <http://www.energystar.gov>. Actual results will vary depending on factors such as climate zone and building design parameters.

**Ordinarily, building maintenance expenses may be deducted in the year incurred. See your tax advisor for guidance in your individual case.

HMS provides solutions to these common roof problems:

Ponding water

Roof leaks

Cracking

If your roof is structurally sound, most problems can be easily and cost-effectively addressed to significantly extend the life of your roof.

Choosing the right roofing solution

Henry® produces quality products and systems, designed to provide you with a solution for most roof maintenance projects – from simple repairs, to recoating to restoration.

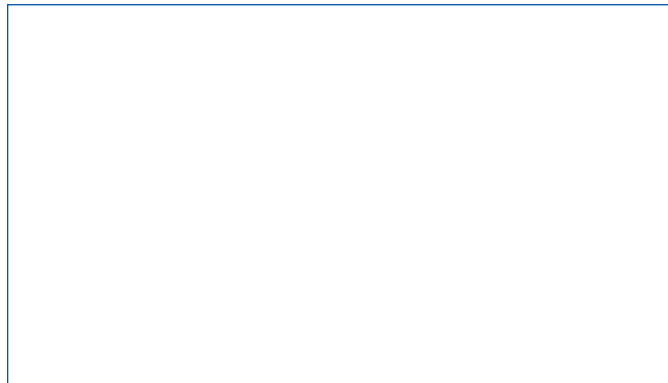

100% Silicone Technology

Acrylic Technology

Aluminum Technology
