

Henry® Pumadeq™ Waterproofing System Selection Chart

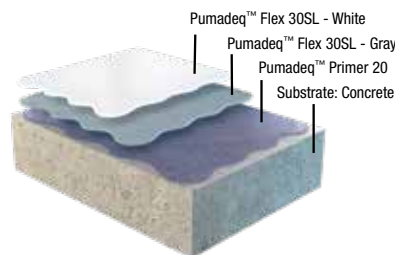

Henry® Pumadeq™ System is a cold fluid-applied, seamless, monolithic waterproofing solution. Using PUMA technology, the system combines Methyl Methacrylates and Polyurethanes for fast cure times, exceptional long-term performance, durability and UV-resistance.

Use the selection chart below to choose which Henry® Pumadeq™ System is right for your waterproofing application.

	Products	Plaza Deck System	Pedestrian / Balcony System	Vehicular Traffic System	Flashing System
Primer	Pumadeq™ Primer 20	●	●	●	●
	Henry® GC Epoxy Primer ¹	●	●	●	●
Membrane	Pumadeq™ Flex 30SL ²	●	●	●	
	Pumadeq™ Flex 31MV ³				●
Reinforcement	Pumadeq™ N Fleece 115	Optional ⁴	Optional ⁴	Optional ⁴	●
Wear coat	Pumadeq™ Grip 40 ⁵	As required ⁸	●	●	
Aggregate	Sand sieve size 20-30 or approved by Henry®	As required ⁸	● ⁶	● ⁶	
Top coat	Henry® Deqcoat™ 50 ⁷		●	●	

- Henry® GC Epoxy Primer may be used in lieu of Pumadeq™ Primer 20 on green or damp concrete surfaces.
- SL (self leveling) for horizontal application only.
- MV (medium viscosity) for vertical or horizontal application.
- Reinforcement in the field is not required on standard Pumadeq™ System applications but may be required if substrate conditions are not acceptable or fleece reinforcement is indicated on the architectural details.
- Pumadeq™ Grip 40 is available in gray and clear for colored aggregate.
- Basic trafficable system requires sand sieve size 20-30 mesh aggregate and gray Deqcoat™ 50. Pedestrian Deco System requires ceramic quartz colored aggregate. When colored aggregate is to be used, select clear Deqcoat™ 50.
- Deqcoat™ 50 is available in gray, white and clear.
- Pumadeq™ Grip 40 and aggregate may be required when heavy traffic is expected or when directly bonded overburden is used.
