

## Constructing Exterior Walls to Avoid Moisture Intrusion

Henry® Company AIA Accredited Continuing Education Presentation

### Course description

Building code changes, mold and mildew, and the drive for energy efficient buildings has increased demand for an effective weather resistive air barrier; and vapor barrier where appropriate. Through a detailed discussion, this presentation will help you understand how to select an effective air barrier to manage air, water, vapor, and energy throughout the building envelope.

Enjoy an engaged discussion, find out which system is right for your project, and ask project specific questions in the comfort of your office!

### Learning objectives

- What is an air barrier?
- When do you need a vapor barrier?
- What is a vapor permeable membrane?
- What are the building code requirements?
- Are all products chemically compatible?
- What are the product testing standards?
- How can air leakage affect a building?

This presentation is a one-hour discussion and qualifies for continuing education credit as recognized by the American Institute of Architects as follows:

**Learning unit(s): 1 LU/HSW Provider number: J557 Program number: AIRBAR**

Henry® Company is a proud member of the American Institute of Architects and offers a variety of accredited continuing education seminars.
