deck coatings

TQ3 North America has over 20 years experience in the waterproofing and deck coating industry – worldwide.

TQ3 North America cares that the work is completed correctly and that the customers' expectations are fully met.

To achieve this our service includes:

- Technical documentation service, from concept to project completion
- Comprehensive on-site installation supervision
- The most innovative and longest warranted waterproofing and deck coating solutions

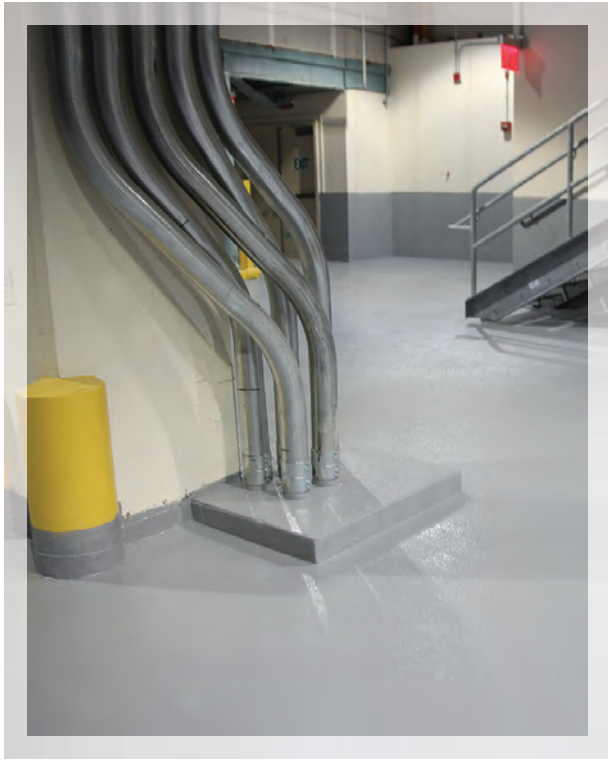

About Dundeq

A waterproof deck coating system, Dundeq is manufactured in the USA but was originally "systematically designed" by TQ3 for use in Europe. Systematic design means that each Dundeq component has been formulated to meet real waterproofing challenges.

These components include:

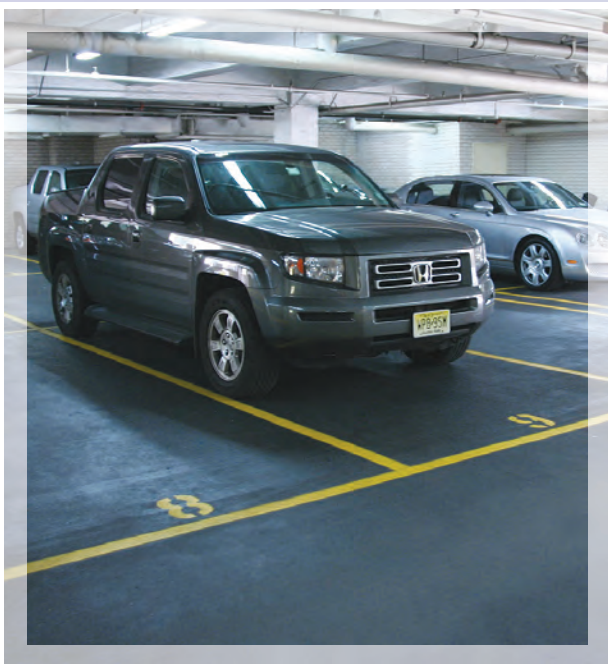

- A sealer/primer to reduce the threat of water and vapor in the substrate
- A liquid membrane to effectively waterproof complicated detailing
- A tough, thick, rapid curing wear coat used in conjunction with a variety of skid resistant aggregates to accommodate long term, heavy traffic
- A rapid curing, high abrasion resistant Topcoat

The result is an easy to specify, fast applied, more durable and long lasting waterproofing. All backed by a single source, 10 year, NDL, labor and material warranty.

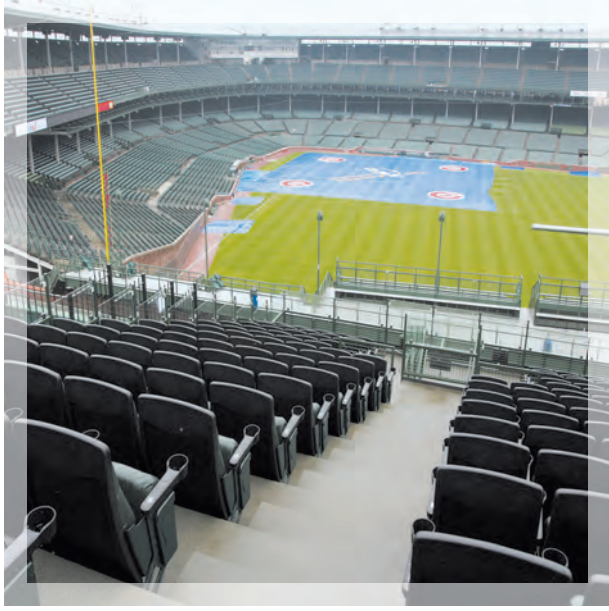

Mechanical Room, Manhattan, NY; 2014
