TQ3 North America, a wholly owned subsidiary of Henry Company, has over 20 years’ experience developing, designing and manufacturing high performance liquid applied waterproofing and traffic coating systems utilizing a broad spectrum of innovative and environmentally conscious chemistries.
TQ3’s range of Qontain™ spray applied membrane systems cover a range of applications, from chemical resistant liners to aesthetically pleasing reflecting pools. Installed by certified installers only, TQ3 provides full technical support from concept to completion. With an extensive 20 year track record, Qontain systems have been installed at many notable locations and are backed by our comprehensive warranty program.

Qontain Advantages

- Instant setting spray applied membrane technology
- Significant reduction downtime
- High build, elastomeric coatings with outstanding crack bridging capability
- Highly impervious and abrasion resistant
- Can be applied on horizontal and vertical surfaces in one coat
- Can be applied at low temperatures
- Coatings available with ANSI/NSF 61 approval
- Resistant to wide range of chemicals including hydrogen sulfide
- Coatings are 100% solids, VOC and odor free
- Composite liner system installed as a seamless, monolithic surface
- Can be applied to geotextiles as a liner system
- Extended warranties

Qontain Uses

- Water Detention Tanks
- Clarifiers
- Digesters
- Secondary Containment
- Fountains
- Holding Tanks
- Reservoirs
- Potable Water Tanks
- Reflecting Pools

Wastewater Rehabilitation
